Customer Information

Access to Site: Buildings are delivered by road.

We will carry components up to 50 paces. If the carry is further please advise us. Note that most buildings will not fit through the house or a side entrance with fixed headrail.

Site Preparation: The customer is responsible for site preparation. A firm level base is required. Please ask for our information sheet or see reverse of order acknowledgement.

Delivery Charge: Free to post codes: BR, CT, DA, ME, RM, SS and TN. £80 to London and post codes BN, CM, CR, EN, GU, HA, IG, KT, RH, SM, TW, UB, and WD.

Erection Service: Available in free delivery area only. Erection is carried out at time of delivery so a firm level base must be prepared in advance.

Customer Assembly: Our buildings enjoy a high degree of prefabrication in our factory. The assembly process is relatively straightforward, requiring DIY skills and basic hand tools. Buildings are supplied complete including felt, glass, fixings and assembly instructions. Please note that some components are heavy.

Breather membrane*: Available as an upgrade on Heavy Duty Workshop and Garden Room. Recommended if insulation/internal lining is to be fitted. Claddings and sole plate pressure treated. Roof, floor, trusses and joinery immersed in golden brown preservative.

Ground Anchoring:

Ground anchoring to prevent wind damage is the responsibility of the customer. Many buildings are adequately located by self-weight but if in doubt, stake down. With the exception of Heavy Duty Workshops sold without floors for which we offer ground anchor brackets at extra cost, ground anchoring work is not undertaken by Passmores.

Routine Maintenance:

Brush apply wood preservative to the exterior within six months, thereafter annually. Periodically cut back overhanging trees and shrubs, check felt for leakage and oil hinges and locks.
